

Lynwood School of Veterinary Nursing

CPD programme 2019

Courses for veterinary professionals

April 24th 2019 2 pm – 4 pm

Responsible Raw Feeding

Kindly sponsored by Nature's Menu

Worried about raw? Clients getting their advice from the internet? Clients with toddlers giving their dog raw chicken bones? Want to make a recommendation for the responsible way to approach this growing feeding trend? Come along to our session with Nature's Menu to get your questions answered and pick up some useful hint and tips for advising your clients. Aimed at all staff.

£20 + VAT – or get this session for half price! See our Facebook page for details.

May 13th 2019 9.30 am – 12.30 pm

Supporting your students through the OSCEs

Lynwood School of Veterinary Nursing

A morning of discussion and practical examples of how to help prepare your students for the practical examinations, avoid common mistakes and get things right. This session is aimed at clinical coaches.

£40 + VAT

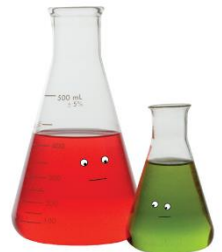

June 3rd 2019 9.30 am – 12.30pm

Would I lie to you? Getting the best from your in-house laboratory

Matthew Garland RSciTech SAC DIP CertNatSci VN MBVNA

Do you know what you are getting when you run a lab test? Could you spot an error and do you know what sample is best for the test? Come along to our mix of practical and theory lab session with the fabulous Matt Garland, previous laboratory manager at TDDS to find out how to get the best from your analysers. Aimed at all staff.

£40 + VAT

July 3rd 2019 7 pm – 9 pm

Anaesthesia: #Relax - A refresher for RVNs and SVNs

Fully booked!

October 21st 2019 9.30 am – 12.30pm

What are my monitors telling me (and what are they not)?

Professor Derek Flaherty BVMS, DVA, DipECVAA, MRCA, FHEA, FRCVS.

RCVS and European Recognised Specialist in Veterinary Anaesthesia and Analgesia

Anaesthetic monitoring equipment is often purchased by veterinary practices without a full understanding of what information it can provide. Even more importantly, the limitations of the equipment may not be appreciated, which can lead to misinterpretation of the data being presented and inappropriate treatment of the patient. This session will explore the common electronic devices used for monitoring anaesthetised patients, and will highlight precisely what information can and cannot be taken from them, as well as exploring some misconceptions associated with this.

£70+ VAT
